

Karen Alexander is a long time circles researcher (1990-present day) who has for many years brought a thoughtful and introspective touch to researching the crop circles. Her work seamlessly fuses sacred art, spirituality, psychology and philosophy. Karen is perhaps best known as the writer behind the annually published Crop Circle Year Books and Crop Circles: Signs, Wonders & Mysteries (Arcturus). She is also known for her hand drawn images and paintings of the crop circles. Karen has a background in counselling and psychotherapy and has facilitated and taken part in a number of groups and projects looking specifically into crop circles and their connection with consciousness.

Dr. Jonathan-Paul DeVierville, Professor Emeritus of The Humanities, History and Interdisciplinary Studies at The Alamo Colleges: St. Philip's College, San Antonio, Texas, is also a Licensed Clinical Social Worker and Licensed Professional Counselor. He has practiced and taught Jungian analytical, depth and archetypal psychology along with clinical psychotherapy at the graduate and post-graduate level with a particular interest in Dreaming, especially Dream Incubation, for over 50 years. For the past 3 decades he directed Alamo Plaza Spa at the Historic Menger Hotel and is an active teacher and consultant on Spa Cultures. Over the past 17 summer seasons he has been engaged directly as an experiencer and researcher exploring the significance and meaning of the Crop Circle Phenomenon.

### THREE DAY WORKSHOP

**About:** For or over a quarter of a century and since the beginning of modern-day interest in the unexplained crop circle phenomenon, it has been known that there exists a curious link between crop circles and human consciousness. This relationship often manifests itself through meaningful coincidences, dates, locations, shapes, people, dreams or sightings of strange luminosities. For those who have spent any time with circles, or those who have taken the time to contemplate their flow, shapes and geometry, this sense of personal connection to the formations is tangible, even vitalising, leaving many feeling drawn to the phenomenon in ways and for reasons that are hard to fully articulate.

So what happens when you've read the books, seen the films, attended the lectures and conferences and perhaps even visited the fields? You might be asking yourself "Great, but what now?" This 3-day/2-night workshop is designed exactly for those asking this very knowing question...

Join our group for three days of immersion in this very beautiful and meaning-filled phenomenon and discover "What Comes Next?"
